SUMMARY

Experienced software engineer with expertise in Web3 applications, cloud infrastructure, and data protection systems. Proficient in frontend (React.js, Vue) and backend (Python, Node.js, Next.js, CI/CD) development. Strong background in automation scripting, cloud platforms (AWS, Azure, GCP), and virtualization. Proven track record in leading teams, mentoring colleagues, and solving complex technical challenges. Passionate about building scalable, high-performance systems.

Languages: English, German, French, Spanish

SKILLS

React.js, Next.js, Vue.js, Tailwind.css, Firebase, Unity, TypeScript, Python, Docker, Bash, NoSQL, SQL, Figma, Cairo

WORK EXPERIENCE

Ferne::Labs **Aug 2024 - Present**
Software Engineer *Vienna, Austria*

- Leading of UI/UX design, architectural decisions, and frontend development using Next.js, Vue, Tailwind, and C#, while also contributing to backend development and implementation.
- Development of Web3 backend services for the Starknet L2 network, leveraging Cairo, Dojo Engine, and Slot.
- Management of server configurations, CI/CD deployment pipelines, and infrastructure on Firebase to ensure scalability and reliability.

Synology **Apr 2023 - Aug 2024**
Full Stack Developer *Paris, France*

- Development and maintenance of internal ticketing tools, enhancing the system with automation, performance reports, and strategic insights for management.
- Development of backend services for distribution, translation, and metrics using Node.js (Express, MongoDB) and Python (FastAPI).
- Management of server configurations, CI/CD deployment pipelines, and infrastructure on self-hosted Docker instances to ensure scalability and reliability.

Synology **Jan 2022 - Apr 2023**
Data Protection Team Referent *Paris, France*

- Leading of training and mentorship initiatives, developing materials and conduction of specialized sessions to enhance team expertise.
- Handling of critical cases from high-end customers and provided support on complex issues to alleviate team workload.
- Reviewing and analysis of escalations to R&D, ensuring high-quality technical assessments and efficient resolutions.
- Development and optimization of automation scripts using Python, JavaScript, Bash, and SQLite to streamline troubleshooting, patching, and system maintenance.

Synology **Aug 2020 - Dec 2021**
Data Protection Technician *Paris, France*

- Work with Network Attached Storage (NAS) servers in Linux environments troubleshooting and patching backup, synchronization and cloud services.
- Scripting and automation with Python, JavaScript, Bash, and SQLite, with expertise in cloud services (AWS, Azure, GCP), virtualization (Hyper-V, VMWare, Docker), and networking.
- Client support ranging from startups to large enterprises, proactively maintaining system integrity and performance.

Asociación Civil Emanuel **Jan 2017 - Mar 2020**
Web Developer *Buenos Aires, Argentina*

- Website development and maintenance for a social and sports center, ensuring a user-friendly interface and responsive design using PHP and JavaScript.
- Branding and logo design, creating a unique visual identity that aligned with the center's mission and target audience.

EDUCATION

E.E.S.T N°7 - Avellaneda, Bs. As., Argentina **Mar 2013 - Dec 2019**
Senior High School (HTL) with a Programming Technician degree.
